**ELIDE FIRE BALL**

**Elide Fire Extinguisher Ball**

In the past if there were any fire incidents, people had to go through a lot of hassle to try and put it out and then if it got out of hand call the fire department to ask for assistance. Now in 2007, a more convenient way of putting out fire has been created by Mr. Woradech Kaimart.

Mr. Woradech Kaimart was born in 1964 in Prachuabkireekhan province. He worked as a Professional Safety Officer for manufacturing companies for many years and is a lecturer in the topic of safety for many public and private organizations. With his valued experience, Mr. Kaimart became an expert in fire safety systems.

A devastating fire broke out in the Royal Jomtien Hotel, Pattaya in 1997; Mr. Kaimart was at the scene as part of the

The amazing new invention, the Elide Fire Extinguisher Ball.

community service. The tragic event inspired him to begin his research to develop equipment for helping people fight the spread of fire at an early stage. His invention, a Fire Extinguishing Ball was created.

The Fire Extinguishing Ball is a ball shaped fire

extinguisher. Simply thrown into a fire, it will activate within 3 seconds and effectively disperse extinguishing chemicals. When a fire occurs and no one is present, the Ball will self-activate when it comes into contact with fire and emit a loud noise as a fire alarm.

Because of this feature, it can be placed in many fire prone areas such as above electrical circuit breaker or in a kitchen. There is no special training or skill required to operate the ball and no need to face the dangers of the fire.

It is light weight - of less than 1.3 kg; good even for women, children and elderly people. It is non-toxic to the environment being made from environmental friendly materials, and the outward driving force from activation of the ball does not harm humans or the environment.

The Elide Fire Extinguish Ball was officially made known to the public at the Eastern Grand Palace, Soi Khaotalo. The product was demonstrated in the car park of the hotel that night and received an award from ISO 9001-2000.

This product is available here in Pattaya at 1,800 Baht each through the Siam Safety Empire Company located in Banglamung.
